LinkedIn: [princekumar-aiml](https://www.linkedin.com/in/princekumar-aiml/)

Career Objective

Seeking a research-oriented internship where I can apply my knowledge of Artificial Intelligence, Machine Learning, Computer Vision, and Large Language Models to solve real-world problems while contributing to impactful research and advancing my technical expertise.

Education

Bansal Institute of Science & Technology Bhopal (Madhya Pradesh), India

B.Tech in Artificial Intelligence & Machine Learning | CGPA: 7.21/10 (Till Semester III) | Expected Graduation: 2028

Devi Mahto M Inter Mahavidyalaya, Bokaro (Jharkhand), India

Jharkhand Academic Council (Class XII): 77.00% | Year: 2024

Saraswati Vidya Mandir, Bokaro (Jharkhand), India

Jharkhand Academic Council | (Class X): 83.40% | Year: 2022

Skills

Programming Languages: Python, C++, JavaScript

Machine Learning: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, OpenCV

AI & Deep Learning: LLMs, OCR, Prompt Engineering

Cloud: Google Cloud Platform (Vertex AI, GenAI Studio), Amazon Web Services (AWS Cloud Fundamentals Certified)

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman

Projects

FasalSathi – AI-Powered Smart Agriculture Platform (Team Project)

Tech Stack: Python, Fast API, TensorFlow, OpenCV, React, MongoDB, Google Cloud

- Developed an AI-powered agriculture platform for crop recommendation, disease detection, and smart farming.
- Contributed to AI/ML modules, backend APIs, and real-time weather integration.
- Implemented computer vision techniques for plant disease detection.
- Collaborated using Git and GitHub for version control and team development

GitHub: <https://github.com/Pawankus6261/agritch.git>

MediSync – AI-Powered Medication Adherence Platform

Tech Stack: React Native (Expo), FastAPI, Python, MongoDB, Google Gemini, Groq, OpenCV, Google Cloud, Firebase

- Developed an AI-powered healthcare platform that converts handwritten prescriptions into structured medication schedules using multimodal LLMs and OCR.
- Built a FastAPI backend with JWT authentication, MongoDB, APScheduler, and real-time push notification workflows for medication adherence.
- Integrated Google Gemini Vision, Groq Llama-3, and Whisper to enable prescription understanding, multilingual AI chat, and voice-based assistance.
- Designed an intelligent reminder and escalation engine with automated notifications, AI voice calls, and caregiver alerts for missed medications.
- Developed patient and doctor applications supporting adherence analytics, secure messaging, and AI-assisted healthcare workflows.
- Deployed cloud-native services using Google Cloud, Firebase, and modern CI/CD practices.

GitHub: <https://github.com/princekumar9349/medisync.git>

Internships

Google Cloud Generative AI Virtual Internship (SmartBridge)

Technologies: Python, Vertex AI, BigQuery, Cloud Functions

- Built Generative AI applications using Vertex AI.
- Completed multiple Google Cloud Skill Labs.
- Worked with prompt engineering, LLMs and cloud deployment.

Certifications

- Gen AI Academy Completion Certificate - [Hack2Skill](#)
- Google Cloud Skill Boost Badges (Vertex AI, BigQuery, GenAI Studio, etc.) - [Skills Google](#)
- AWS Academy Graduate - [AWS Academy Cloud Foundations](#)
- MySQL (Basic) Certification from HackerRank.
- Python Certification from Cisco Network Academic

Achievements

- 1st Prize – MISA Workshop 2025, Microsoft Azure Developer Day, Bhopal.
- Runner-Up – Internal Smart India Hackathon (SIH) 2025, Bansal Institute of Science & Technology.
- Earned multiple Google Cloud Skill Boost badges in Generative AI and Cloud technologies.
